

**Vaew Chang, Eng '22**  
**Major: Mechanical Engineering**  
**Minor: N/A**

Vaew Chang is a Junior at the OPUS College of Engineering at Marquette University. Currently, Vaew is majoring in Mechanical Engineering, with interests in design development and product quality. Originally born in Thailand, Vaew resides in Milwaukee, WI with her family. When she later joined the Health Careers Opportunity Program at Marquette in high school, she knew that Marquette University would provide her the most resources for her academic career. Later, the growth of her passion for engineering soared upon her selection as a recipient of the prestigious Urbans Scholars Scholarship, where she is most involved with on campus. In the Fall of 2019, Vaew had the opportunity to work as an Intern for the Discovery World Science and Technology Museum in Downtown Milwaukee. Within the community, Vaew enjoys volunteering her time in tutoring students from all over the United States in Math and Writing subjects. She also enjoys sewing, playing sports with her family, and reading murder mystery books.

Being a mentee of the Marquette Mentors Program, Vaew is looking forward to gain insights about the industry of Mechanical Engineering with the knowledge and experiences shared with her mentor. She is determined to not only create a meaningful relationship with her mentor, but to build a bond through sharing her culture. For Vaew, a favorite Marquette memory would be participating in the Homecoming Bed Race where she almost crashed her Urban Scholars team into the hay side stands. She can assure that she was a good driver, the wheel was just rusty.
