

COST STRUCTURE

Fees charged will be used to cover the direct cost of services. All research applicants must complete an [AHPRC Resources Application](#) form and have IRB approval. The Resources Application will be used to create an estimate for services. Additional costs will apply if AHPRC staff are required for testing and will be reflected in the estimate. Disposable supplies must be provided by the investigator. In conjunction with the Resources Application and IRB, applicants will need to demonstrate sufficient competency with the equipment that will be used, as judged by AHPRC staff. Costs below reflect investigator-only use costs (without AHPRC staff support) and investigators will be responsible for setup, calibration, and cleanup.

Cost structure is subject to change and will be revised on an annual basis. Costs listed are for internal users. Please contact the AHPRC for external pricing.
